Experience

JULY 2019 - PRESENT

Cetera Financial Group, El Segundo, CA – *Web Developer*

- Utilizing JavaScript to extend custom functionality on web interface frameworks, such as UIkit. Creating reusable code shared across multiple pages and sitelets.
- Review and evaluate incoming requests to determine requirements. Purpose estimated and acceptable delivery times. Provide technical development, and QA, to meet project deliverables dates and SLAs.
- Provide guidance of UX/UI decisions along with implementation.
- Develop and maintain web applications across various workstations.
- Create and update landing pages using HTML/CSS/JavaScript.
- Maintain and update multiple high traffic CMS's and enterprise software.
- Support marketing campaigns, employee engagement, and communications.
- Interact with key stakeholders at all business levels, including executive staff.
- Utilize Adobe Creative Cloud for custom logo/icon creation, photo editing, and wireframes.

SEP 2017 - FEB 2019

CrossFit, Inc., Scotts Valley, CA – *Software Tester (Deployments and Automation)*

- Developed and maintained automated scripts written in NightwatchJS (Node.js end-to-end testing framework). These scripts handled frontend application testing, load testing, and generating dummy data (users, and athletes).
- Led deployments of new builds to test environments running on Amazon Web Services.
- Hybrid role focused on testing the frontend for web, mobile, and tablet applications.
- QA lead for the CrossFit Games - http://games.crossfit.com
- Co- developed QA process used in the CrossFit IT development Agile Lifecycle.

- Co-managed team of QA interns through testing cycles, automation, and test case development.
- Co-managed digital crowd testing partner.

FEB 2016 - MAY 2017

Pierry Software, Redwood City, CA – *Software Engineer*

- Developed web pages and web collect forms using Server-Side JavaScript (SSJS) and AMPscript to update data in Salesforce Marketing Cloud.
- Code dynamic web pages using JavaScript, jQuery, HTML, and CSS for cross-client rendering and deliverability across desktop, mobile, and tablet devices.
- Frontend developer and QA Lead for various marketing campaigns and projects.
- Worked extensively with the Salesforce Marketing Cloud (SFMC) REST APIs. Maintained integration between eCommerce platforms. Maintained Node.js applications.
- Provided consultation for clients in regards to Salesforce Marketing Cloud.

JUL 2016 - NOV 2016

Uber, San Francisco, CA – *Frontend Email Developer*

- HTML Email Developer (Contractor) - Code out email templates to be used in, and deployed from Salesforce Marketing Cloud (ExactTarget). As well as ensure that emails which are being deployed are consistent across major email clients.
- Delivered email templates sent out to all Riders and Drivers.
- Worked within the marketing department, focusing on anything and everything related to email. This includes, but not limited to, marketing promotions, product notifications, confirmations, and lifecycle campaigns.

Licenses & Certifications

Salesforce Certified Marketing Cloud Email Specialist - Salesforce, Issued Jan 2017.

Education

AUG 2015 - JAN 2016

DevMountain, Provo, UT – *Immersive Web Development*

JAN 2012 - MAY 2015

De Anza College, Cupertino, CA – *CIS Major, Communication Minor*
